a Device geometry

Schematic, not to scale; dielectric thicknesses are model assumptions.

b Boundary conditions

Robin: $\partial P/\partial n = -P/\lambda$; $\lambda_b = \lambda_t = 5$ nm

$\boldsymbol{P}_{FE} = P(x,y,z,t)\,\hat{\boldsymbol{z}}$

$\boldsymbol{D} = \varepsilon_0 \varepsilon \boldsymbol{E} + \chi_f P \hat{\boldsymbol{z}}$ $\qquad$ $\boldsymbol{E} = -\nabla\varphi$

$\nabla \cdot \boldsymbol{D} = 0$
